

How to Slow Down Part-Predominant .mp3 Practice Aids

First, **download** the chosen **.mp3** file(s) into your PC or device. Then, use the **TimeStretch Player** to play them at your chosen speed.

Download Heritage Chorale Part-Predominant Practice Aids Files

1. Navigate to the Heritage Chorale Backstage Practice Aids page, and click the desired piece:

2. For the chosen file ("All Voices" in this example) click the three dots at the right:

3. Click "Download":

4. Find the chosen **.mp3** file in your **Downloads** folder.

Use the TimeStretch Player to Choose Your Playback Speed

1. Click [here](#) (or on the link found in the Practice Aids page) to bring up the **TimeStretch Player**. Then, click **“Open Track”**:

2. Choose the file you want to open:

3. Click and drag the **SPEED** knob to the desired speed (slower: to the left) and then click the **“Play”** button.

4. During playback, you can grab the “progress bar” to advance or go back:

5. You can also use the “Begin Loop” and “End Loop” buttons to create a loop so you can practice a desired sequence over and over again:

Result: the selection remains bright, the remainder is darkened, and the loop plays repeatedly until stopped.
